SUSTAINABLE APPROACH OF EXIM

EXIM implements the ESG approach in its professional activities and its own operations on a three-pronged basis:

- EXIM specifically focuses on financing and insuring sustainable projects that will have a positive environmental and social impact.
- EXIM rejects and excludes transactions which burden or are harmful to the environment, or have negative social impact or may violate human rights.
- EXIM places emphasis on conducting exemplary, positive practices in its own operations that have a sustainable social and environmental impact.

E: The organization focuses on the environment in both its professional activities and its own operations, striving to develop an approach that is environmentally responsible and sustainable.

S: Establishes responsible cooperation with its most important external and internal stakeholders by considering their interests and needs and implementing programmes that create long-term social value and help achieve stakeholder satisfaction and trust.

G: Development of an organisational structure that promotes organisational sustainability, with a focus on accountability, transparent governance, internal regulation, controls, organisational processes and related performance indicators, supporting employer branding and internal communication.

EXIM ESG OBJECTIVES

ESG FOCUS
